

Rita and Horst Kruger are specialized to produce real miniature ceramic tiles made of natural clay and porcelain.

You can get the tiles unglazed in natural colors or glazed with a matt, satin or high gloss shine in many different colors. The tiles are very flat and can be laid in well. They are available for the 1:12 scale of the original tile size: in the Victorian era the measure was 5 inch x 5 inch (the equivalent in 1:12 is 10.6 mm x 10.6 mm). Besides the production of finished floors and walls for customers they have a focus in the manufacturing of hand-painted murals. We offer on our website a small selection of matching color patterns that you can lay yourself. For a finished project for a complex ground or a wall with a pattern and color suggestion, please contact the manufacturer directly www.tiny-ceramics.com.
